INTRODUCTION

SMOOTHIES

FAST, EASY, HEALTHY AND DELICIOUS!

An ideal food for health conscious, people-on-the-go, smoothies can be a wonderful breakfast, lunch, or snack. **Fast, nutritious, and very easy to make,** smoothies are blended drinks made from the combination of fruits, vegetables, juice, or other liquids, thickened with ingredients like ice, frozen yogurt, sherbet, or ice cream and flavored with a variety of seasonings.

GETTING STARTED

INGREDIENTS

As you will see from the recipes in this book, you can mix virtually any fruit, vegetable, and liquid to create smoothies with a wonderful variety of flavors and textures. About the only things limiting your options are your imagination and your palate. Here are some of the ingredients found in these recipes:

FRUITS: Apples, apricots, bananas, blackberries, blueberries, boysenberries, cantaloupes, cherries, coconuts, cranberries, dates, grapes, grapefruit, guava, honeydews, kiwis, lemons, limes, mangos, nectarines, oranges, papayas, passion fruit, peaches, pears, pineapples, plums, raspberries, strawberries, and watermelon.

VEGETABLES: Avocados, bell peppers, carrots, celery, cucumbers, onions, pumpkin, radishes, spinach, and tomatoes.

LIQUIDS: A variety of fruit and vegetable juices and nectars, buttermilk, coconut milk, coffee, cream, kefir (a slightly sour brew of fermented milk, often containing about 2.5 % alcohol, similar in taste and texture to a liquid yogurt), milk, mineral water, soy milk, tea, and water.

THICKENING AGENTS: Eggs, honey, ice, ice cream, sherbets, sorbets, tofu, and yogurt.

FLAVORING AGENTS: Cinnamon, cumin, curries, dill, garlic, ginger, herbs, honey, horseradish, liqueurs, mint, nutmeg, olive oil, paprika, parsley, salt, sugar or sugar substitutes, soy sauce, syrups, thyme, and vanilla.

As the list above shows, just about anything can go into a smoothie!

PREPARATION

Buy fresh fruits and vegetables when they are in season and at their freshest. Whenever possible, select ripe fruits and vegetables. Wash and peel these ingredients, remove any seeds if necessary, and cut them up into small, even-sized chunks. Put them in separate sealable baggies and throw them in the freezer. Your ingredients will always be handy for a quick smoothie whenever the mood strikes. Freezing your fruits and vegetables also helps ensure that your smoothie will be icy-cold and will thicken your smoothie without watering it down.

Another great tip is to make ice cubes out of flavored beverages like coffee or tea and use these in your smoothie. When the ice cubes melt, they won't water down the beverage's flavor.

Finally, if you make more than you can drink, just pour the smoothie mixture into small paper cups and pop them into your freezer to create delicious frozen snacks that are great for hot summer days.

EQUIPMENT

The list of items needed to produce your own smoothies is short and sweet:

Sharp knife

Cutting board

Measuring cups and spoons

Spoon (for removing seeds)

Sealable baggies for storing and freezing ingredients

Blender or smoothie maker

BLENDERS VERSUS SMOOTHIE MAKERS

Any good quality blender with a powerful motor (700 watts or more) should do an excellent job for smoothies. However, specialized smoothie makers are also available. A smoothie maker often has a more powerful motor than the average blender and comes with extra sharp blades to easily crush fruit and ice. Our recommendation: buy a powerful blender from a top quality maker and leave the specialty machines to your neighborhood smoothie shop.

TIP

- ▶ It is a good idea to weigh your bagged ingredients and label the baggies with the date, the baggie's contents, and their weight for easy reference. Try to use the contents within one to two weeks of freezing. If fresh ingredients are unavailable, you can often substitute packaged, frozen fruits or vegetables.

BERRIES GALORE!

SWEET, CRISP, AND REFRESHING, berries are a wonderful ingredient for summer smoothies. These berry smoothies will lighten even the hottest days! And, remember, the vital nutrients in fruit help to keep you alert, aid in blood production, and help lower blood pressure, among a few, so you can never eat enough fruit—and smoothies are a great way to make it nutritious and fun.

TOFU ANYONE?

THIS FAVORITE OF THE HEALTH-CONSCIOUS crowd is a hit in smoothies, too! Tofu has a slightly nutty flavor that allows it to take on the flavor of the ingredients it's cooked with. Its texture is smooth and creamy, which provides smoothies with a great consistency. You can find it in most supermarkets and health food stores in regular, low fat, and nonfat varieties.

Silken tofu has a silky-smooth texture and comes in soft, regular, and firm styles (we recommend using soft or regular forms for smoothies).

It's easy to digest, low in calories, calcium and sodium, and high in protein all of which makes it one of today's most healthful food choices.
