Style Style

The first style, as you can see in this picture, is a mini dress, a dress that uses a light purple satin and tulle that is now loved by many people. The star patterned tulle makes the purple dress even more beautiful. Additional accessories such as a belt, white bag, and shoes that match the dress perfectly, make her style sexy and feminine

Second Style

- The second style is very different from the first style, which is this style is a hijab friendly style. This dress is a type of tunic dress, which uses cotton fabric and geometric batik motifs. This dress uses a bat hand model and also it has white tiles at the very bottom of the clothes that make this dress different and unique.

Second Style

This dress is equipped with a belt that you can tie according to your taste. Outside of the dress, you can add accessories such as a slip-on, watch, necklace, and a mini hand bag which will make your outfit look more formal and elegant. addition from me, because of the bat hand model, I suggest you guys to use cufflinks for those who wear hijab.

Thank
You
